3 Valuation Approach and Methodology

3.1 Purpose of Valuation

The Report is being prepared to be relied upon by the Reliant Parties and inclusion, as a whole, a summary thereof or any extracts of the report, in any documents prepared in relation for the disclosure of valuation of assets forming part of the portfolio of Brookfield India REIT under the Securities and Exchange Board of India (Real Estate Investment Trusts) Regulations, 2014 [SEBI (REIT) Regulations], as amended, together with circulars, clarifications, guidelines and notifications thereunder by SEBI and also disclosure as per fair value accounting under Indian Accounting Standards (Ind AS 40).

3.2 Valuation Guideline and Definition

Given the purpose of valuation as mentioned above, the valuation exercise has been carried out to estimate the “Market Value” of the Subject Properties in accordance with the IVSC International Valuation Standards issued in 2021 and effective from 31 January 2022.

As per IVSC International Valuation Standards, “Market Value” is defined as *‘The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.’*

3.3 Valuation Approach

The basis of valuation for the Subject Property being Market Value, the same has been derived by the following approach:

Discounted Cash Flow Method using Rental Reversion

The market practice in most commercial/ IT developments involves contracting tenants in the form of pre-commitments at sub-market rentals to increase attractiveness of the property to prospective tenants typically extended to anchor tenants. Additionally, there are instances of tenants paying above-market rentals for certain properties as well (primarily owing to market conditions at the time of contracting the lease). In order to arrive at a unit value for these tenancies, we have considered the impact of such sub/above market leases on the valuation of the Subject Property.

For the purpose of the valuation of Subject Properties, Income Approach – Discounted Cash Flow Method using Rental Reversion has been adopted.

3.4 Valuation Methodology

In order to compute the Market Value of the Subject Property the following understanding /assessment is required:

- a. Micro Market Assessment where the Subject Property is located.
- b. Portfolio Assessment (existing and future supply, demand from occupiers, average office space take up by an occupier in a particular sector, existing vacancy and the rentals)

- c. Situation of the Subject Property (current achievable rentals, vacancy numbers, competing supply in the micro market etc.) with respect to the micro market.

The details are elaborated below:

Market Assessment:

The Client appointed Cushman & Wakefield (C&WI) to prepare an independent industry and market research report, which has been relied upon to develop the understanding and assess the relevant micro-markets of the Subject Property. The said review, was carried out in the following manner:

- Details study of the market dynamics influencing the rents along with Subject Property rents.
- Assessment of the location setting of the Subject Property in the respective micro-markets.
- Ascertain the transaction activity of office space based on the findings of the industry/market report prepared by C&WI and readily available information in public domain.
- Review of comparable properties in terms of potential competition (both completed and under-construction/future developments), comparable recent lease transactions witnessed in the micro-market along with the trends in leasing within the Subject Property in recent past, wherever available.

The above analysis support to form an opinion on the applicable rental for the micro-market where the respective Subject Property are located (market rent) and on achievable rent for the respective Subject Property for leasing vacant spaces, as well as upon re-leasing of the existing let out area.

Portfolio & Rental Assessment:

- Property Documents and architect certificates were reviewed for validation of area details, ownership interests of the Subject Property.
- Physical site inspections were conducted to assess the current status of the Subject Property.
- The rent rolls along with corresponding leases deeds (on a reasonable sample basis) were reviewed to identify tenancy characteristics for the Subject Property.

Preparation of Future Cash Flows:

- Computing the monthly rental income projected and translating the same to a quarterly cash flow.
- The operational expenses of the respective properties are reviewed to understand the recurring, non-recurring, recoverable and non-recoverable nature expenses and accordingly estimate the margins on the common area maintenance income, which accrues as cash inflows to the Subject Property and normalised for the purpose of cash flow projections
- The projected future cash flows from the Subject Property are based on existing lease terms for the operational area till the expiry of the leases or re-negotiation, whichever is earlier, following which, the lease terms have been aligned with market rents achievable by the Subject Property.
- The cash flows for the operational, under construction and future development area have been projected separately for the purpose of estimating and reporting valuation in accordance with the SEBI (REIT) Regulations
- For vacant area, under-construction area and future development area, the achievable market rent-led cash flows are projected factoring appropriate lease-up time frame for vacant/under-construction/future development area.

- Recurring operational expenses, fit-out income (wherever applicable, however, the same has not been included in the NOI for the purpose of arriving at the terminal value by capitalisation) and vacancy provision have been adopted in-line with prevalent market practices and conditions.
- In addition, appropriate rent-free periods have been adopted during lease roll-overs to consider potential rent-free terms as well as outflows towards brokerage.

These cash flows have been projected for 10-year duration from the date of valuation wherein 11th year Net operating income (NOI) is capitalized for the assessment of terminal value. These future cash flows are then discounted to present-day value (valuation date) at an appropriate discount rate to arrive at the Market Value of the Subject Property.

3.5 Information Sources

The Subject Property related information for the valuation exercise have been provided by the Client and the market data has been provided by Cushman and Wakefield, unless otherwise mentioned.
