This Presentation is for information purposes only without regard to specific objectives, financial situations or needs of any particular person, and should not be disclosed, reproduced, retransmitted, summarized, distributed or furnished, in whole or in part, to any other person or persons. The material that follows is a Presentation on the information pertaining to key updates of Brookfield India Real Estate Trust (“Brookfield India REIT”). We don't assume responsibility to publicly amend, modify or revise any statements in the Presentation on the basis of any subsequent development, information or events, or otherwise. This Presentation comprises information given in summary form and does not purport to be complete and it cannot be guaranteed that such information is true and accurate. For ease and simplicity of representation, certain figures may have been rounded. No representation, warranty or undertaking, express or implied, is made or assurance given that such statements, views, projections or forecasts, if any, are correct or that any objectives specified herein will be achieved. Neither we, nor any of our affiliates, as such, make any representation or warranty, express or implied, as to, and do not accept any responsibility or liability with respect to, any loss, howsoever, arising from any use or reliance on this Presentation or its content or otherwise arising in connection therewith. Unless otherwise stated in this Presentation, the information contained herein is based on management information as they exist as of date/date indicated in this Presentation and estimates. The information contained herein is subject to change without notice and past performance is not indicative of future results.

Certain information contained herein constitutes forward-looking statements. Due to various risks and uncertainties, actual events or results or the actual performance of Brookfield India REIT may differ materially from those reflected or contemplated in such forward-looking statements. Although Brookfield India REIT believes that the anticipated future results, performance or achievements expressed or implied by the forward-looking statements and information are based upon reasonable assumptions and expectations in light of the information presently available, you should not place undue reliance on forward-looking statements and information because they involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Brookfield India REIT to differ materially from anticipated future results, performance or achievement expressed or implied by such forward-looking statements and information. Factors that could cause actual results to differ materially from those set forward in the forward-looking statements or information include but are not limited to: general economic conditions, changes in interest and exchange rates, availability of equity and debt financing and risks particular to underlying portfolio company investments. There is no guarantee that Brookfield India REIT will be able to successfully execute on all or any future deals, projects or exit strategies, achieve leasing plans, secure debt or receive development approvals as set forth in this Presentation. Projected results reflected herein have been prepared based on various estimations and assumptions made by management, including estimations and assumptions about events that have not yet occurred. Projected results are based on underwriting. Due to various risks, uncertainties and changes beyond the control of Brookfield, the actual performance of the Brookfield India REIT could differ materially from the projected results. There is no assurance, representation or warranty being made by any person that any of the projected results will be achieved and undue reliance should not be put on them. Industry experts may disagree with the assumptions used in presenting the projected results.

Any changes to assumptions could have a material impact on projections and actual returns. Actual returns on unrealized investments will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, legal and contractual restrictions on transfer that may limit liquidity, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions and circumstances on which the valuations used in the prior performance data contained herein are based. Accordingly, the actual realized returns on unrealized investments may differ materially from the returns indicated herein.

In considering investment performance information contained herein, you should bear in mind that past performance is not necessarily indicative of future results and there can be no assurance that comparable results will be achieved, that an investment will be similar to the historic investments presented herein (because of economic conditions, the availability of investment opportunities or otherwise), that targeted returns, diversification or asset allocations will be met or that an investment strategy or investment objectives will be achieved. Any information regarding prior investment activities and returns contained herein has not been calculated using generally accepted accounting principles and has not been audited or verified by an auditor or any independent party. Nothing contained herein should be deemed to be a prediction or projection of future performance.

Certain of the information contained herein is based on or derived from information provided by independent third party sources. BROOKFIELD INDIA REAL ESTATE TRUST REPORTS Q2 FY2026 FINANCIAL RESULTS

Plans to acquire a 7.7M sf Grade A office campus in Bengaluru for Rs 131,250 million

Brookfield India Real Estate Trust (Tickers: BSE: 543261, NSE: BIRET) ("BIRET"), India's only 100% institutionally managed office REIT, today announced its financial results for the quarter ended September 30, 2025.

"We delivered another strong quarter, achieving 90% occupancy due to strong demand from global capability centers and leading corporates for our high-quality assets. Building on our strong inorganic growth track record, we announced the proposed acquisition of Ecoworld, which is a 48-acre, 7.7 million square feet office campus located on the Outer Ring Road in Bengaluru. This acquisition will mark our entry into one of India's strongest office markets, expanding the size of our REIT by over 30% and positioning us as a truly pan India platform. Our embedded growth prospects remain strong with continued leasing momentum, making us well-positioned to deliver value to our unitholders." said **Alok Aggarwal, Chief Executive Officer and Managing Director, Brookfield India Real Estate Trust.**

KEY HIGHLIGHTS: Q2 FY2026

Leasing

- Achieved gross leasing of 592,000 square feet, with an average re-leasing spread of 21%
- Committed occupancy crossed over 90%, up more than 10% since SEZ policy reforms, reflecting consistent leasing momentum across portfolio assets
- Leasing activity was driven by strong demand from global capability centers (GCCs), which contributed ~46% of total gross leasing during the quarter

Financial Performance

- Income from Operating Lease Rentals grew 12% YoY to Rs 4,757 million (from Rs 4,257 million in Q2 FY2025)
- Net Operating Income (NOI) increased 13% YoY to Rs 5,094 million (from Rs 4,512 million in Q2 FY2025)
- Net Asset Value (NAV) increased by 4% to Rs. 349 per unit (from Rs 336 per unit in Q4 FY2025)
- Distributions of Rs 5.25 per unit were announced, totaling Rs 3,360 million, representing 14% YoY growth over Q2 FY2025

KEY HIGHLIGHTS: H1 FY2026

- Achieved gross leasing of 1.2M sf, including 1.1M sf of new leasing and 0.2M sf of renewals
- Operating Lease Rentals grew by 10% YoY to Rs 9,340 million (from Rs 8,460 million in H1 FY2025)
- Net Operating Income grew by 13% YoY to Rs 10,080 million (from Rs 8,911 million in H1 FY2025)
- Announced distributions totaling Rs 6,551 million (Rs 10.50 per unit)

Overview of the Proposed acquisition

- Brookfield India REIT has signed binding agreements to acquire a 100% interest in Ecoworld for Rs 131,250 million. Ecoworld is a 48 acre, 7.7 million square feet office campus on Outer Ring Road (ORR), Bengaluru, one of India's strongest office micro-markets. The asset is leased to a diverse roster of global capability centers including Honeywell, Morgan Stanley, State Street, Standard Chartered, Shell, KPMG, Deloitte, Cadence among others
- Attractive entry metrics at a 6.5% discount to GAV, expected to result in [1.7]% pro-forma NAV accretion and [3.0]% proforma DPU accretion
- The acquisition will have significant scale and diversification benefits for Brookfield India REIT. The Operating Area will increase by [31]%, Gross Asset Value will increase by [34]%, the GCC share in tenancy will increase to 45%⁽²⁾ and top 10 tenant concentration will reduce to [30]%⁽²⁾
- The transaction will re-rate the distribution profile of the Brookfield India REIT, and is expected to increase the share of dividends from ~16% to ~30% in the near term, thereby making it attractive to a wider unitholder base
- The Board of the Manager proposes to fund the acquisition through Rs 35 billion new debt issuance, Rs 10 billion of cash proceeds from the Q2FY2026 preferential issue, and a new equity issuance of Rs 25 billion

Environmental, Social and Governance (ESG)

- Received 5-star rating from GRESB for the fourth consecutive year
- Recognized as Global Sector Leader and ranked #1 in Asia for Sustainable Mixed-use Development for Baytown, Kolkata, with 100% score
- Recognized as Global Sector Leader and ranked #1 in Asia for Standing investments, with 94% score
- Awarded EDGE (Excellence in Design for Greater Efficiencies) certification by International Finance Corporation (IFC), for achieving over 20% savings in energy, water, and embodied energy in seven of nine buildings in Downtown Powai

(2) Percentage of gross contracted rents

Transaction Summary

Brookfield India REIT has signed binding agreements to acquire a **100% stake** in Ecoworld⁽¹⁾, a 48 acre / 7.7 MSF⁽²⁾ operating asset located in Bengaluru, for an acquisition price of **Rs 131,250 Million**

Deal Highlights

- Increasing Scale: operating area to increase by 31% and consolidated GAV to increase by 35%
- Enhancing Diversification: Bengaluru to become the largest market for the REIT at 32% share of GAV (at-share)
 - GCC share in tenancy to increase to 45% and top 10 tenant concentration to reduce to 30% (both on contracted rents)
- Highly Accretive: attractive entry discount and payment plan, expected to achieve accretion of 3.0% on DPU and 1.6% on NAV
- Re-rating Distribution Mix: share of dividends expected to almost double to ~30%⁽³⁾ in the near term, making it attractive to a wider unitholder base

Deal Terms

- Acquisition Price: Rs 131,250 Million, implying a 6.5% discount⁽⁴⁾ to GAV, a 7.7% FY27E cap rate and a 8.9% FY29E cap rate
- Payment Plan: Rs 120,000 Million (Tranche 1) and Rs 11,250 Million to be paid at 18 months (Tranche 2), aligning the payment timing with income generation profile
- Rent-free True-up: REIT will receive Rs 1,000 Million against the rent frees on committed tenancy, helping secure full cash distribution
- FSI Earnout: Seller to get an amount for additional FSI along with Tranche 2 (upto Rs 2,000 Million), only if it could be feasibly consumed. Management estimates that no earnout will be due up to 1.0 MSF of additional FSI as per the formula (Refer page 18 for more details)

Funding Plan

- In order to finance the acquisition, the REIT shall target to raise Rs 25,000 Million through an institutional placement⁽⁵⁾, with higher enabling approvals (for Rs 35 B) to create headroom for future growth opportunities
 - Combined with Rs 45 B capital raised over last 12 months, the REIT will have sufficient balance sheet capacity to finance Tranche 1
 - Tranche 2 will be financed through debt / equity which will be raised in future

(1) Including the operational services contract.

(2) The property has additional 0.1 MSF development potential that could be utilized in the existing towers.

(3) Management estimate.

(4) The discount to GAV does not factor the present value impact of Tranche 2.

(5) Brookfield India REIT may also consider other forms of fund raising, including preferential allotment of units, in accordance with applicable law.

Value Add Opportunity | Campus 3

Campus 3, a 5.3 acre / 0.7 MSF built SEZ campus, is going into refurbishment in Q2FY27, following relocation of the existing tenant to another tower within the park. The site may also be suitable for a profitable redevelopment at attractive yields, if adequate additional FSI is secured

Base Case: Refurbishment Plan

- De-notify or convert into Non-processing Area (NPA). Post conversion, overall NPA areas will remain within the 50% regulatory limit under the SEZ regulations
- Re-launch the campus for leasing on back of a comprehensive refurbishment program (Rs 1,500 Million capex)

Upside Case: Potential Redevelopment

- If the TOD Policy⁽¹⁾ is notified, additional FSI can become available for a purchase, and can be evaluated for a redevelopment of Campus 3 into a modern office tower for large build-to-suit requirements
- Management expects that at 1.0 MSF additional FSI (total 1.5 MSF including 0.5 MSF of existing tower FSI), a redevelopment would lead to attractive yields and significant profits (refer table below)

Redevelopment Area (1.5 MSF FSI / 2.0 MSF GLA)

Tranche 2	Rs 11,250 Million	
FSI Premiums	Rs 2,500 Million	at Rs 2,500 PSF on additional FSI
Capex / Conversion / Approval Costs	Rs 1,250 Million	Management estimate
FSI Earnout ⁽²⁾	- -	As per the formula
All-in Land Cost⁽²⁾	Rs 15,000 Million	Rs 10,000 PSF on FSI
Development Cost	Rs 15,000 Million	Rs 7,500 PSF on GLA
Total Cost	Rs 30,000 Million	
Rent Potential (Yr 5)	Rs 3,450 Million	at Rs 115 PSF market rent grown at 5.0% p.a.
Estimated YoC	11.5%	on Land + Capex
Estimated Profit	Rs 16,000 Million	at 7.5% exit cap rate

(1) Karnataka Transit-Oriented Development Policy - which applies to properties in proximity of the metro lines.

(2) As per deal terms, an FSI Earnout is only payable if the Total FSI that could be feasibly consumed (including utilized FSI in Campus 3) x Rs 10,000 PSF, leads to any surplus post deducting (a) Tranche 2, (b) FSI premiums, (c) capex incurred on Campus 3, (d) denotification / NPA conversion costs, and (d) other costs to procure or enable consumption of FSI. Such surplus shall be paid along with the Tranche 2 but capped at Rs 2,000 Million.

Basis of Presentation of Pro-forma and Certain Other Information

Pro-forma Metrics

In this Transaction Document, Brookfield India REIT presents certain unaudited, pro-forma operational and financial metrics (the “Pro-forma Metrics”) as of and for the 6 months ended September 30, 2025 (unless specified otherwise), as adjusted to give effect to the Ecoworld Acquisition, as if it had occurred on April 1, 2025 (“Acquisition Related Event”). Brookfield India REIT has agreed to acquire up to 100% of the Target SPV. Accordingly, the Pro-forma Metrics (including Pro-forma Consolidated GAV) have been calculated assuming 100% stake in the Target SPV, unless otherwise specified. The Pro-forma Metrics will vary in case any of the assumptions change, including any changes in the consideration for acquisition of the Target Asset on account of potential closing adjustments. The metrics of the entities/ businesses being acquired have been computed on the same basis as the corresponding metrics of Brookfield India REIT as of/ for the 6 months ended September 30, 2025.

This Transaction Document, specifically the section titled “Information regarding the Target Asset”, comprises certain unaudited financial information of the Target Asset as of and for the 6 months ended September 30, 2025 which may be subject to change upon completion of audit, including changes relating to the constituent metrics on account of regrouping and presentation of such metrics.

Any metrics referred to in the Transaction Document (including the metrics set out below) in relation to the Pro-forma Portfolio will be deemed to be a part of the Pro-forma Metrics.

- Pro-forma NAV
- Pro-forma DPU
- Pro-forma Consolidated GAV
- Pro-forma LTV
- Pro-forma Operating Area

The methodologies used for calculating Pro-forma DPU and Pro-forma LTV, are in line with the methodologies used for calculating such metrics for the Current Portfolio for the quarter ended September 30, 2025. Further, the Pro-forma DPU is derived on the run-rate based on occupancy and in-place rent which includes LOIs committed to-date for the Target Asset.

The Pro-forma Metrics are presented for illustrative purposes only and do not purport to represent what the actual results of operations would have been if the events for which the adjustments were made had occurred on the dates assumed, nor does it purport to project the results of operations of Brookfield India REIT for any future period or its financial condition at any future date. The future operating results of Brookfield India REIT and the actual outcome of acquisition of the Target Asset may differ materially from the pro forma amounts set out in this Transaction Document due to various factors, including changes in operating results. Further, the Pro-forma Metrics have not been prepared in accordance with the requirements of Regulation S-X under the U.S. Securities and Exchange Act of 1934, as amended, U.S. GAAP, IFRS or Ind-AS. The resulting Pro-forma Metrics have not been audited or reviewed in accordance with U.S. GAAP, IFRS or Ind-AS. The Pro-forma Metrics address hypothetical situations and do not represent actual consolidated financial condition of Brookfield India REIT, distributions or results of operations, and is not intended to be indicative of our future financial condition, distributions and results of operations. The adjustments set forth in the Pro-forma Metrics are based upon available information and assumptions that the Manager believes to be reasonable. The rules and regulations related to the preparation of pro-forma financial information in other jurisdictions may vary significantly from the basis of preparation for the pro-forma financial information. Accordingly, the Pro-forma Metrics should not be relied upon as if it has been prepared in accordance with those standards and practices. Further, the Acquisition Related Event described above is subject to the completion of various conditions and there is no assurance that they will all be successfully completed. In case any of the Acquisition Related Event are not completed, the Pro-forma Metrics presented herein would be entirely incorrect.

Readers should note that a presentation of the Acquisition Related Event, on a pro-forma basis, should not be construed to mean that acquisitions of the Target Asset or the Acquisition Related Event will definitely occur, including as described in this Transaction Document. It is clarified that SEBI has issued a circular dated December 6, 2023 on the ‘Revised Framework for Computation of Net Distributable Cash Flow (NDCF) by Real Estate Investment Trusts (REITs)’ pursuant to which the revised framework for computation of NDCF is applicable to us from April 1, 2024.

Industry and Market Data

Unless stated otherwise, industry and market data used in this Transaction Document is based on C&W Research and is confirmed by C&W, who has been engaged by the Manager. Industry publications generally state that the information contained in such publications has been obtained from publicly available documents from various sources believed to be reliable, but their accuracy and completeness are not guaranteed, and their reliability cannot be assured. The data used in these sources may have been re-classified for the purposes of presentation. Data from these sources may also not be comparable. Such data involves risks, uncertainties and numerous assumptions and is subject to change based on various factors. The extent to which the market and industry data used in this Transaction Document is meaningful depends on the reader’s familiarity with and understanding of the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which business of Brookfield India REIT is conducted, and methodologies and assumptions may vary widely among different industry sources.

Certain Other Information

Certain data contained in this Transaction Document, including financial information, has been subject to rounding adjustments. Accordingly, in certain instances, the sum of the numbers in a column, row or table may not conform exactly to the total figure given for that column, row or table, or the sum of certain numbers presented as a percentage may not conform exactly to the total percentage given. Certain information in this Transaction Document (in particular, the Pro-forma Metrics) has been presented to show the impact of the acquisition of the Target Asset, for presentation purposes only.

All operating or financial metrics presented in this Transaction Document are as of/ for the 6 months ended September 30, 2025, unless otherwise indicated. Further, the Pro-forma DPU is derived on the run-rate based on occupancy and in-place rent which includes LOIs committed to-date for the Target Asset.

All figures corresponding to year denoted with “FY” are, as of or for the one-year period ending (as may be relevant) 31st March of the respective year. Similarly, all figures corresponding to year denoted with “CY” are, as of or for the one-year period ending (as may be relevant) 31st December of the respective year. Unless specifically mentioned otherwise, any reference to year refers to CY and financial year to FY.

3 Valuation Approach and Methodology

3.1 Purpose of Valuation

The Report is being prepared to be relied upon by the Reliant Parties and inclusion, as a whole, a summary thereof or any extracts of the report, in any documents prepared in relation for the disclosure of valuation of assets proposed to be acquired by Brookfield India REIT under the Securities and Exchange Board of India (Real Estate Investment Trusts) Regulations, 2014 [SEBI (REIT) Regulations], as amended, together with circulars, clarifications, guidelines and notifications thereunder by SEBI and also disclosure as per fair value accounting under Indian Accounting Standards (Ind AS 40).

3.2 Valuation Guideline and Definition

It is understood that the valuation is required by the Client of the Subject Property which is proposed to be acquired (“Proposed Acquisition”) by Brookfield India REIT, in accordance with the Securities and Exchange Board of India (Real Estate Investment Trusts) Regulations, 2014, as amended, together with clarifications, guidelines and notifications thereunder in the Indian stock exchange and for accounting purposes. Accordingly, the valuation exercise has been carried out to estimate the “Market Value” of the Subject Property in accordance with IVSC International Valuation Standards, as effective from 31st January 2025 and as applicable on the date of valuation.

Market Value” is defined as ‘*The estimated amount for which an asset or liability should exchange on the date of valuation between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.*’

3.3 Valuation Approach

The basis of valuation for the Subject Property being Market Value, the same has been derived by the following approach:

Discounted Cash Flow Method using Rental Reversion

The market practice in most commercial/ IT developments involves contracting tenants in the form of pre-commitments at sub-market rentals to increase attractiveness of the property to prospective tenants typically extended to anchor tenants. Additionally, there are instances of tenants paying above-market rentals for certain properties as well (primarily owing to market conditions at the time of contracting the lease). In order to arrive at a unit value for these tenancies, we have considered the impact of such sub/above market leases on the valuation of the Subject Property.

For the purpose of the valuation of Subject Properties, Income Approach – Discounted Cash Flow Method using Rental Reversion has been adopted.

3.4 Valuation Methodology

In order to compute the Market Value of the Subject Property the following understanding /assessment is required:

- a. Micro Market Assessment where the Subject Property is located.
- b. Portfolio Assessment (existing and future supply, demand from occupiers, average office space take up by an occupier in a particular sector, existing vacancy and the rentals)
- c. Situation of the Subject Property (current achievable rentals, vacancy numbers, competing supply in the micro market etc.) with respect to the micro market.

The details are elaborated below:

Market Assessment:

The Client appointed Cushman & Wakefield (C&WI) to prepare an independent industry and market research report, which has been relied upon to develop the understanding and assess the relevant micro-markets of the Subject Property. The said review, was carried out in the following manner:

- Details study of the market dynamics influencing the rents along with Subject Property rents.
- Assessment of the location setting of the Subject Property in the respective micro-markets.
- Ascertain the transaction activity of office space based on the findings of the industry/market report prepared by C&WI and readily available information in public domain.
- Review of comparable properties in terms of potential competition (both completed and under-construction/future developments), comparable recent lease transactions witnessed in the micro-market along with the trends in leasing within the Subject Property in recent past, wherever available.

The above analysis support to form an opinion on the applicable rental for the micro-market where the respective Subject Property are located (market rent) and on achievable rent for the respective Subject Property for leasing vacant spaces, as well as upon re-leasing of the existing let out area.

Property Rental Assessment:

- Property Documents and architect certificates were reviewed for validation of area details, ownership interests of the Subject Property.
- Physical site inspections were conducted to assess the current status of the Subject Property.
- The rent rolls along with corresponding leases deeds (on a reasonable sample basis) were reviewed to identify tenancy characteristics for the Subject Property.

Preparation of Future Cash Flows:

- Computing the monthly rental income projected and translating the same to a quarterly cash flow.
- The operational expenses of the respective property are reviewed to understand the recurring, non-recurring, recoverable and non-recoverable nature expenses and accordingly estimate the margins on the common area maintenance income, which accrues as cash inflows to the Subject Property and normalised for the purpose of cash flow projections
- The projected future cash flows from the Subject Property are based on existing lease terms for the operational area till the expiry of the leases or re-negotiation, whichever is earlier, following which, the lease terms have been aligned with market rents achievable by the Subject Property.
- The cash flows for the operational, under construction and future development area have been projected separately for the purpose of estimating and reporting valuation in accordance with the SEBI (REIT) Regulations

- For vacant area, under-construction area and future development area, the achievable market rent-led cash flows are projected factoring appropriate lease-up time frame for vacant/under-construction/future development area.
 - Recurring operational expenses, fit-out income (wherever applicable, however, the same has not been included in the NOI for the purpose of arriving at the terminal value by capitalisation) and vacancy provision have been adopted in-line with prevalent market practices and conditions.
 - In addition, appropriate rent-free periods have been adopted during lease roll-overs to consider potential rent-free terms as well as outflows towards brokerage.
- These cash flows have been projected for 10-year duration from the date of valuation wherein 11th year Net operating income (NOI) is capitalized for the assessment of terminal value. These future cash flows are then discounted to present-day value (valuation date) at an appropriate discount rate to arrive at the Market Value of the Subject Property.
- For the leasehold land we have incorporated the rent to paid as per the agreement provided by client. Same has been deducted to arrive at the net operating income (NOI).

3.5 Information Sources

The Subject Property related information for the valuation exercise have been provided by the Client and the market data has been provided by Cushman and Wakefield, unless otherwise mentioned. The documents provided has been assumed to be a true copy of the original. The rent rolls have been cross checked with the lease deeds on a sample basis only to ensure its correctness.

The market value of financial interest in Ecoworld as on 30th September 2025 is as follows:

INR 140,031 Million

(Indian Rupees One Hundred and Forty Billion and Thirty One Million Only)

5 SEBI ADDITIONS

5.1 NOI

5.1.1 Ecoworld

Considering the above-discussed assumptions on rental growth, market trends, supply-demand conditions, and macroeconomic factors, the projected Net Operating Income (NOI) growth for the operational campuses in Ecoworld is as detailed below:

Particulars	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9	Year 10	Year 11
Net Operating Income (INR Mn)	7,708	9,420	10,917	11,867	12,393	13,025	14,084	14,979	15,844	16,582	17,652
Growth		22%	16%	9%	4%	5%	8%	6%	6%	5%	6%

5.2 Discount Rate

The discount rate applied to the available cash flows reflects the opportunity cost to all the capital providers, namely shareholders (Cost of Equity) and creditors (Cost of Debt), weighted by the relative contribution to the total capital of the company (WACC). The opportunity cost to the capital provider equals the rate of return the capital provider expects to earn on other investments of equivalent risk.

- Cost of Debt**

The cost of debt is the return that a company provides to its debtholders and creditors. These capital providers need to be compensated for any risk exposure that comes with lending to a company. The cost of debt for real estate assets is often influenced by the stage of development of the asset. The mature and income-generating assets are considered less risky, leading to lower interest rates. In this context, the cost of debt for Brookfield India REIT properties is benchmarked to the interest rates observed in REITs, as all bear similar characteristics in terms of type and development status of properties. Since a major portion of REITs' portfolios consists of completed, income-generating assets, the cost of debt aligns more closely with the Lease Rent Discounting (LRD) rate.

This approach ensures that the cost of debt is aligned with the risk profile of the property and current market conditions, Please find below Cost of Debt for Comparable REIT.

Entity Name	Cost of Debt
Brookfield (June 2025)	8.10%
Embassy (June 2025)	7.55%
Mindspace (June 2025)	7.84%
Knowledge Realty Trust (June 2025)	8.99%

Source: Analyst Presentation for respective REIT

The cost of debt for September 2025 valuation is considered as ~ 8.4 %, which been determined based on the cost of debt for the REITs.

- Cost of Equity**

We have considered the cost of equity at 14.50% as per the market return expectations of various investors for commercial office. Apart from that we have also benchmarked CAPM model and inputs of same is detailed out as under

- We have considered risk free rate of 6.96 % based on average 10-year treasury bond yield.
- For calculation of beta, we have benchmarked industry (Nifty Realty Index). We have considered average 5-year Beta of Nifty Realty index with respect to Nifty 50.
- We have considered market risk premium of 5.59% based on the returns of broad-based BSE 500 stock index for the past 10 to 15 years.

• **Debt-Equity Ratio (weightage of WACC)**

As discussed earlier, the cost of debt has been derived based on prevailing LRD rates, while the cost of equity has been calibrated to account for both asset-specific and market-specific factors, reflecting investor expectations from an operational Grade A office spaces. Additionally, the debt-to-equity mix has been determined considering the typical LRD tenures and the extent to which debt financing contributes to the overall asset value.

It may be noted basis management representation that the current debt equity structure of Brookfield India REIT is 30:70. However, SEBI REIT Regulations states that the maximum permissible limit for debt is 49%. Hence, we have considered the debt and equity mix of 45% and 55% which lies well within the limit specified as per the SEBI REIT Regulations and is also accepted by the market participants.

Derivation of WACC

Based on above, the following WACC rate has been assumed for completed commercial assets part of the Brookfield India REIT:

	Cost	Weightage	
Cost of Debt	8.4%	45.0%	~11.75%
Cost of Equity	14.5%	55.0%	

Note: As per management representation planned debt equity structure for Brookfield India REIT is 45:55.

Capitalisation rate assumptions

The capitalization rate adopted for valuing various assets has been based on factors such as:

- Relevant parameters of some key investments in comparable properties of similar quality, use, tenant profile made by institutional real estate investors were perused. Further, considering that these investments have been made through institutional player, the cap rate for the Subject Property was suitably adjusted.

The selected comparable investments consist of investment-grade A properties with a similar tenant profile, commercial usage backed by institutional investors. These properties primarily include large office parks, aligning closely with the characteristics of the REIT properties. Considering these criteria, following comparable transactions have been analyzed to derive the capitalization rate:

Name of Seller	Name of Buyer	Location	City	Name of Building	Type of Building	Year of Transaction	Area (sq. ft.)	Deal Size (INR mn)	Capitalization Rate
Shapoorji Pallonji-Allianz	GIC	Gachibowli	Hyderabad	Waverock 2.1	Commercial	2024	22,84,918	21,500	~8%
MFAR Developers	Edelweiss Alternatives	Outer Ring Road	Bangalore	Embassy Manyata Tech Park	Commercial	2024	11,00,000	15,000	~8%
Kalyani Developers	Tablespace Technologies	Whitefield	Bangalore	Kalyani Camellia	Commercial	2024	5,00,000	5,000	~8%
Bhartiya Group	GIC	Hebbal	Bangalore	Bhartiya City	Commercial	2023	30,00,000	28,000	~8%
Brookfield Asset Management	GIC & Brookfield REIT	Powai	Mumbai	9 Grade A Properties in Downtown Powai	Commercial	2023	27,00,000	65,000	~8%
Brookfield Properties	Brookfield REIT & GIC	Gurugram	NCR	Candor Techspace G1	Commercial	2023	37,98,366	47,250	~8%
Salarpuria Sattva	Continental Automotive	Electronic city	Bangalore	South Gate	Commercial	2022	8,50,885	7,516	8.32%
TRIL Properties	CPPIB	Suburban South	Chennai	TRIL Info Park	Commercial	2022	46,67,000	63,000	~7.6% - 7.7%
Embassy Property Developments Pvt. Ltd.	Embassy Office Parks REIT	ORR, Bangalore	Bangalore	Embassy Tech Village	Commercial	2020	91,00,000	97,824	7.50%

- Source: Secondary Market Research
- Note: The above information is based on information published in public domain and discussions with various market players

Based on these considerations, an exit capitalisation rate ranging between 7.5% and 8.5% has been adopted, with the lower end of the range applied to assets demonstrating superior performance and fundamentals. Thus we have considered the cap rate as 8% for the valuation of Ecoworld.

11 Disclosure and Publications

You must not disclose the contents of this report to a third party in any way, except as allowed under the Securities Exchange Board of India (Real Estate Investment Trust) Regulations, 2014 along with SEBI (Real Estate Investment Trusts) (Amendment) Regulations 2016 and subsequent amendments and circulars. As per the terms and regulation 2(1) of the Securities Exchange Board of India (Real Estate Investment Trust) Regulations, 2014 along with SEBI (Real Estate Investment Trusts) (Amendment) Regulations 2016 and subsequent amendments and circulars.

B REVIEW FINDINGS

Our exercise has been to review the Stated Procedure, which has been used, for conducting valuation of Properties in connection with disclosure of valuation of assets, to be formed as a part of portfolio of Brookfield India REIT, in accordance with the Securities and Exchange Board of India (Real Estate Investment Trusts) Regulations, 2014, as amended, together with clarifications, guidelines and notifications thereunder in the Indian stock exchange, in accordance with the IVSC International Valuation Standards issued in December 2024 and effective from 31 January 2025.

The approach adopted by C&WI would be to review the Stated Procedure, which would have a significant impact on the value of Properties, such as:

- Achievable Rental for the property
- Rental Growth Rate
- Construction Timelines
- Capitalisation Rate
- Discount Rate
- Occupancy Projections

C&WI has:

- Independently reviewed the key assumptions as set out in the Stated Procedure and is of the opinion that they are reasonable.
- Independently reviewed the approach and methodology followed and analysis as set out in the Stated Procedure, to determine that it is in line with the guidelines followed by RICS and hence is appropriate.

C&WI finds the assumptions, departures, disclosures, limiting conditions as set out in the Stated Procedure, relevant and broadly on lines similar to RICS guidelines. No other extraordinary assumptions are required for this review.

The commercial real estate sector has shown significant improvement in last 2 years. Factors resulting in increase in the office demand includes a broad-based participation by large and small occupiers, continued entry of new GCCs into India, increased hiring by IT-BPM firms and start-ups, more employees returning to office.

We observe that the assumptions noted in Annexure 2, reflect these factors.

Below is the summary of the property as of 30th September 2025 which is located in Bengaluru that has been reviewed:

1. Based on Architect's Certificate Dated (25th October 2025) for Ecoworld.

Below is the Property wise analysis:

REIT Portfolio

- **Ecoworld** : C&WI view of the achievable market rent office (including parking) for the asset would be in the range of INR 105-115 per sq. ft. per month. Achievable market rent for retail portion would be in the range of INR 88-93 per sq. ft per month. This is keeping in mind the latest transactions within the park and competing office developments in the vicinity. C&WI considers the discount rate appropriate and cap rate in line with the market.

Considering the above-mentioned points, C&WI considers the market assumptions and the approach to valuation for the above Property to be reasonable and in line with international valuation standards (RICS).

 - c. In the absence of a detailed field survey of the market and industry (as and where applicable), C&WI has relied upon secondary sources of information for a macro-level analysis. Hence, no direct link is to be established between the macro-level understandings on the market with the assumptions estimated for the analysis.
 - d. The services provided is limited to review of assumptions and valuation approach and other specific opinions given by C&WI in this Report and does not constitute an audit, a due diligence, tax related services or an independent validation of the projections. Accordingly, C&WI does not express any opinion on the financial information of the business of any party, including the Client and its affiliates and subsidiaries. The Report is prepared solely for the purpose stated and should not be used for any other purpose.
 - e. While the information included in the Report is believed to be accurate and reliable, no representations or warranties, expressed or implied, as to the accuracy or completeness of such information is being made. C&WI will not undertake any obligation to update, correct or supplement any information contained in the Report.
 - f. In the preparation of the Report, C&WI has relied on the following information:
 - i. Information provided to C&WI by the Client and subsidiaries and third parties;
 - ii. Recent data on the industry segments and market projections;
 - iii. Other relevant information provided to C&WI by the Client and subsidiaries at C&WI's request;
 - iv. Other relevant information available to C&WI; and
 - v. Other publicly available information and reports.

3. The Report is reflecting matters as they currently exist. Changes may materially affect the information contained in the Report.
4. In the course of the analysis, C&WI has relied on information or opinions, both written and verbal, as currently obtained from the Clients as well as from third parties provided with, including limited information on the market, financial and operating data, which would be accepted as accurate in bona-fide belief. No responsibility is assumed for technical information furnished by the third-party organizations, and this is bona-fidely believed to be reliable.
5. No investigation of the title of the assets has been made and owners' claims to the assets is assumed to be valid. No consideration will be given to liens or encumbrances, which may be against the assets. Therefore, no responsibility is assumed for matters of a legal nature.

Annexure 2: Extract of Methodology & Key Assumptions for the Valuation of Property

Note: The Property has been referred to as “Subject Property” by the valuer. Similar representation has been followed in this section.

Valuation Approach and Methodology

- **PURPOSE OF VALUATION**

The purpose of this exercise is to provide a valuation review of the Subject Property to be formed as part of the portfolio of Brookfield India REIT, for reporting purposes under the SEBI (Real Estate Investment Trust) Regulations, 2014, as amended, together with clarifications, guidelines and notifications thereunder and also disclosure requirement of fair valuation of investment properties as per (Ind AS) 40.

- **VALUATION GUIDELINE AND DEFINITION**

Given the purpose of valuation review as mentioned above, the exercise has been carried out to estimate the “Market Value” of the Subject Property in accordance with the IVSC International Valuation Standards issued in December 2024 and effective from 31 January 2025

As per IVSC International Valuation Standards, “Market Value” is defined as ‘*The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.*’

- **VALUATION APPROACH**

The basis of valuation for the Subject Property being Market Value, the same has been derived by the following approach:

Discounted Cash Flow Method using Rental Reversion

The market practice in most commercial/ IT developments involves contracting tenants in the form of pre-commitments at sub-market rentals to increase attractiveness of the property to prospective tenants typically extended to anchor tenants. Additionally, there are instances of tenants paying above-market rentals for certain property as well (primarily owing to market conditions at the time of contracting the lease). In order to arrive at a unit value for these tenancies, we have considered the impact of such sub/above market leases on the valuation of the Subject Property.

For the purpose of the valuation of Subject Property, Income Approach - Discounted Cash Flow Method using Rental Reversion has been adopted.

- **Valuation Methodology**

In order to compute the Market Value of the Subject Property the following understanding /assessment is required:

- a. Micro Market Assessment where the Subject Property is located.
- b. Portfolio Assessment (existing and future supply, demand from occupiers, average office space take up by an occupier in a particular sector, existing vacancy and the rentals)
- c. Situation of the Subject Property (current achievable rentals, vacancy numbers, competing supply in the micro market etc.) with respect to the micro market.

The details are elaborated below:

Market Assessment:

The Client appointed Cushman & Wakefield (C&WI) to prepare an independent industry and market research report, which has been relied upon to develop the understanding and assess the relevant micro-markets of the Subject Property. The said review, was carried out in the following manner:

- Details study of the market dynamics influencing the rents along with Subject Property rents.
- Assessment of the location setting of the Subject Property in the respective micro-markets.
- Ascertain the transaction activity of office space based on the findings of the industry/market report prepared by C&WI and readily available information in public domain.
- Review of comparable properties in terms of potential competition (both completed and under-construction/future developments), comparable recent lease transactions witnessed in the micro-market along with the trends in leasing within the Subject Property in recent past, wherever available.

The above analysis support to form an opinion on the applicable rental for the micro-market where the respective Subject Property are located (market rent) and on achievable rent for the respective Subject Property for leasing vacant spaces, as well as upon re-leasing of the existing let out area.

Portfolio & Rental Assessment:

- Property Documents and architect certificates were reviewed for validation of area details, ownership interests of the Subject Property.
- Physical site inspections were conducted to assess the current status of the Subject Property.
- The rent rolls along with corresponding leases deeds (on a reasonable sample basis) were reviewed to identify tenancy characteristics for the Subject Property.

Preparation of Future Cash Flows:

- Computing the monthly rental income projected and translating the same to a quarterly cash flow.
- The operational expenses of the respective properties are reviewed to understand the recurring, non-recurring, recoverable and non-recoverable nature expenses and accordingly estimate the margins on the common area maintenance income, which accrues as cash inflows to the Subject Property and normalised for the purpose of cash flow projections.
- The projected future cash flows from the Subject Property are based on existing lease terms for the operational area till the expiry of the leases or re-negotiation, whichever is earlier, following which, the lease terms have been aligned with market rents achievable by the Subject Property.
- The cash flows for the operational, under construction and future development area have been projected separately for the purpose of estimating and reporting valuation in accordance with the SEBI (REIT) Regulations
- For vacant area, under-construction area and future development area, the achievable market rent-led cash flows are projected factoring appropriate lease-up time frame for vacant/under-construction/future development area.
- Recurring operational expenses, fit-out income (wherever applicable, however, the same has not been included in the NOI for the purpose of arriving at the terminal value by capitalisation) and vacancy provision have been adopted in-line with prevalent market practices and conditions.

- In addition, appropriate rent-free periods have been adopted during lease roll-overs to consider potential rent-free terms as well as outflows towards brokerage.

These cash flows have been projected for 10-year duration from the date of valuation wherein 11th year Net operating income (NOI) is capitalized for the assessment of terminal value. These future cash flows are then discounted to present-day value (valuation date) at an appropriate discount rate to arrive at the Market Value of the Subject Property.

For Subject Property those are short term leasehold in nature, these cash flows have been projected for a duration until the land lease for the Subject Property expires. These future cash flows are then discounted to present-day value (valuation date) at an appropriate discount rate to arrive at the Market Value of the Subject Property.

**Assumptions, Disclaimers,
Limitations & Qualifications:**

This valuation report is provided subject to assumptions, disclaimers, limitations and qualifications detailed throughout this report which are made in conjunction with those included within the Assumptions, Disclaimers, Limitations & Qualifications section located within this report.

Reliance on this report and extension of our liability is conditional upon the reader's acknowledgement and understanding of these statements. This valuation is for the use of the party to whom it is addressed and for no other purpose. No responsibility is accepted to any third party who may use or rely on the whole or any part of the content of this valuation. The valuer has no pecuniary interest that would conflict with the proper valuation of the asset.

Heightened Market Volatility:

It's important to note that ongoing geopolitical tensions across various regions present significant uncertainty, with the potential for rapid escalation. Further, recent increases and proposed changes to international trade tariffs among major economies, and geopolitical risk relating to energy prices have added further volatility and uncertainty. Collectively, these factors contribute to elevated risks to global trade and economic stability. The potential impact on the Indian economy and property market remains uncertain, with the possibility of heightened market volatility in some property markets over the short-to-medium term.

Experience has shown that consumer and investor behaviour can quickly change during periods of such heightened volatility. Lending or investment decisions should account for this heightened level of volatility and potential for deteriorating market conditions both domestically and globally. Caution is advised in this regard.

Conclusions set out in this report are valid as at the valuation date only. Where appropriate, we recommend that the valuation/market is closely monitored, as we continue to track how markets respond to evolving events

Construction Cost Volatility:

Although general increases in material costs have stabilised since 2022, some specialised supply chains and construction-related labour costs remain volatile with the potential for further increases. This has created uncertainty in cost estimates, which is likely to continue.

In addition, there are significant risks that delays may be encountered in sourcing specialised materials and labour, and as such, the potential for ongoing cost escalations and delays is high. This may place additional pressure on developer and contractor profit margins and development viability.

These inherent risks should therefore be given careful consideration in lending and investment decisions. Caution is advised in this regard.

Development Valuation:

The value of real estate developments is traditionally highly volatile and can be subject to rapid changes of value in short timeframes. Development projects appeal to specific types of purchasers and can be significantly impacted by many factors such as broader economic conditions, fluctuating levels of supply and demand for the product, changes in building costs and the availability and cost of development finance. All these (and more) factors could have a significant impact on the value and demand for the Subject Property.

Going forward there will be several key factors impacting on the viability of some development projects and their underlying land values. Key concerns are fluctuations in construction costs, substantial new supply levels and easing investor demand for final product. In addition, we also note that ongoing monitoring and governance of banking systems may significantly restrict development capital and increase the cost of development finance.

As experienced in previous market cycles, the value of real estate developments can undergo rapid and significant price corrections, as supply, demand and cost factors change. Any Reliant Party is strongly advised to consider this inherent risk in their investment and/or lending decisions. Lending and investment caution is advised in this regard.

The applicant's ability to service debt should also be carefully considered, should development opportunities and settlements be extended, construction/funding costs increase, or sales rescinded.

2.6. SCOPE OF SERVICES

The valuation has been undertaken to ascertain the Market Value of the Subject Property given the prevalent market conditions. In consideration of the same, a detailed assessment of the site and surroundings has been undertaken with respect to the prevalent activities, change in dynamics impacting the values and the optimal use of the Subject Property vis-à-vis the surrounding micro market, etc.

The primary catchment for the valuation has been defined as Sarjapur Outer Ring Road and other neighboring micro-markets. In-depth research has been conducted in the catchment area of the Subject Property to ascertain the prevalent activity levels in terms of leasing in the commercial office (IT/ITeS SEZ and Non SEZ) segment. This has been achieved through interactions with various market players such as local real estate brokers, developers, end-users, etc.

The location, micro market and catchment area for the Subject Property is tabulated below:

Asset Name	SPV/Hold Co	City	Micro-market/ Catchment Area
Ecoworld	Arliga Ecoworld Business Parks Private Limited*	Bengaluru	ORR

2.10. ASSUMPTIONS, DISCLAIMERS, LIMITATIONS & QUALIFICATIONS

Valuation Subject to Change:	The subject valuation exercise is based on prevailing market dynamics as on the date of valuation and does not take into account any unforeseeable developments which could impact the same in the future
Our Investigations:	IVAS Partners are not engaged to carry out all possible investigations in relation to the Subject Property. Where in our report IVAS Partners identify certain limitations to our investigations, this is to enable the reliant party to instruct further investigations where considered appropriate or where the IVAS Partners recommend as necessary prior to reliance. IVAS Partners are not liable for any loss occasioned by a decision not to conduct further investigations
Assumptions:	Assumptions are a necessary part of undertaking valuations. The Valuer adopts assumptions for the purpose of providing valuation advice because some matters are not capable of accurate calculation or fall outside the scope of the Valuer's expertise, or the instructions. The reliant parties accept that the valuation contains certain specific assumptions and acknowledges and accepts the risk that if any of the assumptions adopted in the valuation are incorrect, then this may have an effect on the valuation
Information Supplied by Others:	This valuation is based on the information provided by the Client (Brookfield Real Estate Trust). The same has been assumed to be correct and has been used for the valuation. Where it is stated in the report that another party has supplied information to iVAS, this information is believed to be reliable but iVAS can accept no responsibility if this should prove not to be so.
Matters which affect or may affect the valuation	If the Reliant Party becomes aware of any matters which affect or may affect the valuation, then Valuer must be advised of those matters. The Reliant Party's failure to do so will disentitle the Reliant Party to place reliance on the valuation and reliance must not be placed on the valuation/s under any circumstance
Future Matters:	To the extent that the valuation includes any statement as to a future matter, that statement is provided as an estimate and/or opinion based on the information known to iVAS at the date of this document. iVAS does not warrant that such statements are accurate or correct.
Map and Plans:	Any sketch, plan or map in this report is included to assist the reader while visualizing the property and assume no responsibility in connection with such matters. Further, all maps and plans quoted in our report are solely for illustration purposes only. While they are extracted from public sources, they may be not to scale. Valuer does not warrant that such dimensions shown are accurate.
Site Details:	Based on title due-diligence report provided by the Client, the Valuer understands that the Subject Property is free from any encroachments and is available as on the date of the valuation
Property Title:	For the purpose of this valuation exercise, the Valuer has relied on the Title diligence report & other documents provided by the Client for the Subject Property and has made no further enquiries with the relevant local authorities in this regard. Further, the Valuer has not undertaken search at the office of jurisdictional Sub-Registrar of Assurances ("SRO") to ascertain registered encumbrances, if any, in connection with the Subject Property. The Valuer does not have the expertise or the preview to verify the veracity or quantify these encumbrances, disputes or claims. For the purpose of this valuation, the Valuer has assumed that the asset has title deed that is clear and marketable
Environmental Conditions:	In preparing our valuation we assume that no contaminative or potentially contaminative use is, or has been, carried out at the property. We do not undertake any investigation into the past or present uses of either the property or any adjoining or nearby land, to establish whether there is any potential for contamination from these uses and assume that none exists. Should it, however, be subsequently established that such contamination exists at the property or on any adjoining

	land or that any premises have been or are being put to contaminative use, this may have a detrimental effect on the value reported.
Town Planning:	The current zoning of the Subject Property has been adopted on the basis of review of various documents (approval documents) provided by the Client and the current land use maps for the subject region. The same has been considered for the purpose of this valuation exercise. Further, it has been assumed that the development on the Subject Property adheres/ would adhere to the development regulations as prescribed by the relevant authorities. The Valuer has not made any enquiries with the relevant development authorities to validate the legality of the same.
Area:	The total leasable area considered for the purpose of this valuation exercise is based on the architect certificate, rent roll, area statement and other information/documents provided by the Client. It must be noted that all the above information provided by the Client has been verified based on the approvals/ layout plans/building plans/CLU document/Title diligence report/Technical due diligence report and other documents provided by the Client. However, the Valuer has not undertaken additional verification and physical measurement for the purpose of this valuation exercise.
Condition & Repair:	In the absence of any information to the contrary, we have assumed that there are no abnormal ground conditions, nor archaeological remains present which might adversely affect the current or future occupation, development or value of the property; the property is free from rot, infestation, structural or latent defect; no currently known deleterious or hazardous materials or suspect techniques have been / will be used in the construction of or subsequent alterations or additions to the property and comments made in the property details do not purport to express an opinion about, or advice upon, the condition of uninspected parts and should not be taken as making an implied representation or statement about such parts.
Not a Structural Survey:	We state that this is a valuation report and not a structural survey.
Legal:	Unless specifically disclosed in the report, the Valuer has not made any allowances with respect to any existing or proposed local legislation relating to taxation on realization of the sale value of the Subject Property. We do not read legal documentation. Where legal documentation is provided to us, we will have regard to the matters therein but recommend that reliance should not be placed on our interpretation thereof without prior verification by your legal advisors. Unless disclosed to us, we assume that there are no outstanding statutory breaches or impending litigation in respect of the property. We further assume that all documentation is satisfactorily drawn and that unless disclosed to us, there are no unusual or onerous restrictions, easements, covenants or other outgoing which would adversely affect the value of the relevant interest(s). In respect of leasehold assets, we will assume that your landlord will give any necessary consents to an assignment. Unless notified to the contrary we assume that each property has a good and marketable title and is free from any pending litigation.
Other:	Considering the unorganized nature of real estate markets in India, all comparable evidence (if any) provided in the valuation report has been limited to the basic details such as the area of asset, rate at which transacted, broad location and other specific details would be provided only if the information is available in public domain.
Other Assumptions/Observations:	Please note that all the factual information such as tenants' leasable area, lease details such as lease rent, lease commencement and lease end date, lock – in period, escalation terms, etc. pertaining to the Subject Property's is based on the rent roll provided by the Client as of 30 th September 2025 and the same has been adopted for the purpose of this valuation exercise. The rent rolls have been cross-checked with copies of the lease deeds on a sample basis as shared with the Valuer to verify the authenticity. Any change in the above information will have an impact on the assessed value and in that case the Valuer will have to relook at the assessed value.

	All measurements, areas and ages quoted in the Valuation Report are approximate. We are not advisors with respect to legal, tax and regulatory matters for the transaction. No investigation of the respective Asset SPVs holding the assets' claim to title of assets has been made for the purpose of this Valuation Report and the Asset SPVs' claim to such rights have been assumed to be valid. No consideration has been given to liens or encumbrances against the assets. Therefore, no responsibility is assumed for matters of a legal nature.
Flooding risk:	We have assumed that either there is no flooding risk or, if there is, that sufficient flood defences are in place and that appropriate building insurance could be obtained at a cost that would not materially affect the capital value.
Site Conditions:	We do not commission site investigations to determine the suitability of ground conditions and services, nor do we undertake environmental or geotechnical surveys. We have assumed that these aspects are satisfactory and also that the site is clear of underground mineral or other workings, methane gas or other noxious substances. In the case of asset which may have redevelopment potential, we proceed on the basis that the site has load bearing capacity suitable for the anticipated form of redevelopment without the need for additional and expensive foundations or drainage systems (unless stated otherwise)
Hazardous & deleterious materials	Unless otherwise noted, we have assumed that the improvements are free of Asbestos and Hazardous Materials, or should these materials be present then they do not pose significant risk to human health, nor require immediate removal. We assume the site is free of subsoil asbestos and have made no allowance in our valuation for site remediation works. Our visual inspection is an inconclusive indicator of the actual condition/presence of asbestos/hazardous materials within the asset. We make no representation as to the actual status of the Asset. If a test is undertaken at some time in the future to assess the degree, if any, of the presence of any asbestos/hazardous materials on site and this is found to be positive, this valuation must not be relied upon before first consulting iVAS Partners to reassess any effect on the valuation. Unless specifically instructed, we do not carry out investigations to ascertain whether any building has been constructed or altered using deleterious materials or methods. Unless specifically notified, our valuation assumes that no such materials or methods have been used.
Unregistered interests:	We have assumed that there are no unregistered interests or interests not captured by the applicable Regulatory Authority in the country which services are to be carried out which may affect market value. In the event that the Reliant Party becomes aware of any further or pending easements, encumbrances or unregistered interests, this valuation must not be relied upon before first consulting iVAS Partners in writing to reassess any effect on the valuation
Market Uncertainty:	Heightened Market Volatility It's important to note that ongoing geopolitical tensions across various regions present significant uncertainty, with the potential for rapid escalation. Further, recent increases and proposed changes to international trade tariffs among major economies, and geopolitical risk relating to energy prices have added further volatility and uncertainty. Collectively, these factors contribute to elevated risks to global trade and economic stability. The potential impact on the Indian economy and property market remains uncertain, with the possibility of heightened market volatility in some property markets over the short-to-medium term. Experience has shown that consumer and investor behaviour can quickly change during periods of such heightened volatility. Lending or investment decisions should account for this heightened level of volatility and potential for deteriorating market conditions both domestically and globally. Caution is advised in this regard. Conclusions set out in this report are valid as at the valuation date only. Where appropriate, we recommend that the valuation/market is closely monitored, as we continue to track how markets respond to evolving events.

Construction Cost Volatility:

Although general increases in material costs have stabilised since 2022, some specialised supply chains and construction-related labour costs remain volatile with the potential for further increases. This has created uncertainty in cost estimates, which is likely to continue.

In addition, there are significant risks that delays may be encountered in sourcing specialised materials and labour, and as such, the potential for ongoing cost escalations and delays is high. This may place additional pressure on developer and contractor profit margins and development viability.

These inherent risks should therefore be given careful consideration in lending and investment decisions. Caution is advised in this regard.

Development Valuation:

The value of real estate developments is traditionally highly volatile and can be subject to rapid changes of value in short timeframes. Development projects appeal to specific types of purchasers and can be significantly impacted by many factors such as broader economic conditions, fluctuating levels of supply and demand for the product, changes in building costs and the availability and cost of development finance. All these (and more) factors could have a significant impact on the value and demand for the Subject Property.

Going forward there will be several key factors impacting on the viability of some development projects and their underlying land values. Key concerns are fluctuations in construction costs, substantial new supply levels and easing investor demand for final product. In addition, we also note that ongoing monitoring and governance of banking systems may significantly restrict development capital and increase the cost of development finance.

As experienced in previous market cycles, the value of real estate developments can undergo rapid and significant price corrections, as supply, demand and cost factors change. Any Reliant Party is strongly advised to consider this inherent risk in their investment and/or lending decisions. Lending and investment caution is advised in this regard.

The applicant's ability to service debt should also be carefully considered, should development opportunities and settlements be extended, construction/funding costs increase, or sales rescinded.

3. MARKET OVERVIEW

3.1. OVERVIEW OF BENGALURU

Bengaluru, also known as India's 'Silicon Valley', is located in Karnataka and is the largest technology hub in Asia and the fourth largest in the world. Karnataka represents 41% of India's total technology exports in FY2024. Bengaluru is often referred to as the Startup Capital of India, accounting for almost 50% of the total Indian Startup funding since 2014. Bengaluru hosts approximately 1,900+ startups, making up 22% of India's total startups as of May 2024. Further, the city has the largest number of Indian Unicorn Startups (approximately 42% share) valued over US\$1 bn as of June 2025. The city also houses approximately 42% of the total Engineering Research and Development (ER&D) talent present in tier-I cities in India in FY2024.

Occupiers prefer Bengaluru given its quality office offering at competitive rentals along with the availability of a talented and affordable workforce. Bengaluru has been leading in terms of absorption between CY2016 to Q1CY2025, with approximately 27.8% share among the top 7 cities in the country. The city has also emerged as the GCC leader in India, backed by a large talent pool, a mature technology ecosystem, and a strong start-up landscape. Bengaluru held a 42.7% share of total pan-India GCC leasing during CY2022 – Q1CY2025. The city is home to the world's second largest AI talent pool as of January 2025. While technology, Engg. & Mfg., and BFSI sectors remain the primary demand drivers, retail, aerospace, semiconductor, and life sciences companies are also establishing niche GCCs. The city is well-connected via extensive transportation infrastructure which is undergoing a comprehensive upgrade, including construction of upcoming metro lines and road projects aiming to provide better access to commercial zones.

Key Office Sub-markets

The Bengaluru office market consists of seven sub-markets as Outer Ring Road (ORR), Peripheral Business District - Others (PBD-O), Extended Business District (EBD), Peripheral Business District - Whitefield (PBD-W), North Bengaluru (NBD), Central Business District (CBD), and South Bengaluru (SBD) as tabulated below:

Bengaluru: Supply, Absorption and Vacancy

Source: IVAS Research; as of June 30, 2025; *Forecasts for years CY2025, CY2026 and CY2027 have been projected based on the current market situation and information available regarding future supply and current absorption. Forecasts have been projected under the assumption that absorption continues to grow at a similar pace compared to the last two years. Kindly note that there are no official databases available for uniform tracking. Further, analysis undertaken above may differ from the data and forecasts published elsewhere. Forecasts are an estimate only and inherently uncertain and must not be considered a guarantee; all figures are an approximation.

Bengaluru has experienced an unprecedented level of occupier interest, with office demand in the city consistently being higher than supply (CY2016-2019) which led to low vacancy levels. Bengaluru has recorded the highest cumulative net absorption of 84.7 msf globally during CY2016 - Q2CY2025. With consistent high demand coupled with moderating supply from Q3CY2025 till CY2027, overall vacancy is expected to reduce by 14.9%.

Bengaluru: Rental Trends

Backed by strong market fundamentals, Bengaluru office market witnessed steady rental growth with a CAGR of 6.5% between CY2016–CY2019. Average rents as of Q2CY2025 is ₹93.7 psf pm. Going forward, office rentals at a city level are forecasted to witness a CAGR of 6.3%, between Q1CY2025–CY2027 with key sub-markets of PBD-W, CBD, EBD and PBD-O expected to lead the growth.

ORR: Supply, Absorption & Vacancy

ORR, being one of the most prominent sub-markets in the city, has historically recorded higher office demand compared to supply completions resulting in low vacancy levels, not exceeding 7.0% between CY2016-CY2020. A gradual increase in vacancy was observed from CY2021 onwards attributable to higher supply completions compared to lower absorption. Going forward, vacancy is forecasted to drop to 9.0% by the end of CY2027 from 10.3% as of Q2CY2025, due to the sub-market's mature ecosystem, relatively lower future supply, proximity to residential zones, availability of talent, and the upcoming metro connectivity that make it attractive for businesses.

Rentals in ORR have grown at a healthy CAGR of 6.1% for the period CY2016 – CY2019. As of Q2CY2025, the sub-market commands average rental of ₹103.8 psf pm and is forecasted to grow at 3.5%- 4.00% per annum from Q1CY2025 to CY2027. While the micro-market average is projected to soften, quality Grade A assets, including the Subject Property are expected to continue to grow at this historical momentum which is 5-6% per annum. This forecasted rental growth is attributable to the

limited future supply competing with Subject Property and good connectivity being further enhanced with ongoing construction of metro phase 2A (expected to be operational by the end of CY2027). The improved connectivity and reduced commute times is expected to further boost demand in the sub-market, resulting in low vacancy.

3.2. MICROMARKET OVERVIEW

The Subject micro-market is located towards the South-East of Bengaluru city, extending from KR Puram junction till Sarjapur Road intersection along Outer Ring Road (ORR). The micro-market has emerged as a prominent IT/ ITeS destination, subsequent to the establishment of Intel Campus in 2002. Further, commercial activity in the subject region was catalysed post completion of the ORR in 2004. Owing to the strategic location and excellent accessibility, the micro-market has also been witnessing significant development activity of large-scale commercial projects (SEZ & Non SEZ) over the past few years.

Few of the prominent commercial IT/ITeS developments in the subject micro-market include Prestige Tech Park, Cessna Business Park, Ecospace, Ecoworld, Salarpuria Hallmark, Salarpuria Touchstone, Embassy TechVillage, etc. The subject micro-market has also witnessed development of SEZs such as Cessna Business Park, Bagmane World Technology Centre and Pritech Park which houses prominent companies such as Cisco, Accenture, Cap Gemini, Intuit, Genpact, etc.

With the increase in IT/ ITeS activity in the recent past, residential activity has also witnessed a commensurate increase in and around the region to support the increasing demand of working populace looking at housing options close to their workplace. The subject micro market is also witnessing development of business hotels primarily on account of demand from corporates. Prominent business hotels operational in this location include Novotel, Park Plaza, IBIS, Courtyard, Fairfield, etc.

Following map highlights the micro market of the subject development:

3.2.3. Market Rent Analysis

Based on our interactions with the market players and developers in the region, it is observed that the lease rentals for office space are primarily determined by the factors such as location, accessibility, space off take, type of development, related infrastructure provision for the site, distance from the key hubs of the city, services provided, etc.

A few of the notable transactions that have been observed in the past in the subject micro-market are highlighted below:

Transaction Date	Tenant	Tenant Sector	Leasable Area (sf)	Base Rental (INR /sf / month)*
Q2,2025	Tenant 1	Flexible Space Operator	1,45,000	107 (WS)
Q2,2025	Tenant 2	Life Sciences	78,893	115 (WS)
Q2,2025	Tenant 3	Technology	33,502	105 (WS)
Q2, 2025	Tenant 4	Technology	93,413	119 (WS)

Q3, 2024	Tenant 16	Banking, financial services, insurance	27,500	105 (WS)
Q3, 2024	Tenant 17	Technology	34,172	114 (WS)
Q2, 2024	Tenant 18	Research, consulting & analytics	24,064	111 (WS)

Source: Market Research; *Rent for Warm shell space

Based on the above table, we understand that majority of the recent transactions reported ranges between **INR 105– 119 per sqft per month (warm shell space)**. The variance across rentals is primarily due to factors such as location, accessibility, tenant mix, quantum of vacant spaces within the development, infrastructure & amenities, additional improvements, etc.

It should be noted that majority of the commercial developments located in the micro-market are witnessed to offer warm shell space (viz. 100% Power Back Up, High Side AC, one layer of Fire Sprinklers and finished toilets).

In addition, the maintenance charge for these developments varies in the range of INR 12.0 - 15.0 psf pm. The parking charges in such developments range between INR 3,000 - 5,000 per bay per month for covered car parks.

3.2.4. Rent and Absorption Future Outlook for micro market

The Sub-market viz. ORR, being one of the most prominent micro-market in the city, has historically recorded higher office demand than supply completions resulting in low vacancy levels. This can be attributed to the micro-market connectivity that make it attractive for businesses.

The rentals in the ORR are projected to grow at a decent rate, which is attributed to the limited future supply, single digit vacancies along with improved public transport with ongoing construction of metro phase 2A, which is expected to be operational by the end of CY2026.

Thus, the improved connectivity and reduced commute times is expected to further boost demand in the micro market. The positive market dynamics, premium positioning and asset quality are expected to continue driving demand for office space in the ORR region.

3.3. MARKET OUTLOOK

Based on our market research, we understand that Outer Ring Road micro-market is perceived as one of the most notable destinations for both national and global occupiers on account of location advantage, connectivity, quality space offering, large scale developments offering scalability options, etc. Surrounded by a well developed residential infrastructure the location offers superior ecosystem for both corporates and its employees. The location is expected to continue as one of the leading micro markets within the City, which is going to be supported by continued development of quality Grade A spaces and planned infrastructure initiatives such as the under-development Metro Phase.

Further, the Subject Property is well positioned in the market to attract interest from occupiers owing to its location, specifications and amenities, developer's reputation, quality space offering, tenant relations, etc. Therefore, keeping in perspective the Subject Property's location, leasing in the micro market, quantum of leasable area, quality of construction, developer's reputation, type of space, etc., we are of the opinion that the Subject Property would command a lease rental of approx. INR 105 - 110 per sf per month as on date of valuation.

5. VALUATION APPROACH AND METHODOLOGY

5.1. SCOPE OF VALUATION

The valuation exercise is to assess the Market Value of the Subject Property. The valuations have been conducted in accordance with the IVSC International Valuation Standards, (effective 31 January 2025).

5.2. BASIS OF VALUATION

The valuations have been conducted in accordance with the IVSC (International Valuation Standards Council) effective from 31 January 2025 and is in compliance with the International Valuation Standards (IVS) and in accordance with the SEBI REIT Regulations 2014. The valuation exercise has been undertaken by appropriately qualified Valuer and would be aimed at assessing the Market Value of Subject Property.

As per the International Valuation Standards, Market Value is defined as:

‘The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s length transaction, after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion’.

5.3. APPROACH AND METHODOLOGY

The purpose of this valuation exercise is to estimate the Market Value (MV) of the Subject Property. Market Value is derived through the following Methodologies:

5.3.1. Direct Comparison Approach

In **‘Direct Comparison Approach’**, the property is compared to similar properties that have actually been sold in an arms-length transaction or are offered for sale. The comparable evidence gathered during research is adjusted for premiums and discounts based on property specific attributes to reflect the underlying value of the property.’

5.3.2. Income Approach

The income approach is based on the premise that value of an income - producing asset is a function of future benefits and income derived from that asset. There are two commonly used methods of the income approach in real estate valuation namely, income capitalization and discounted cash flow (DCF).

A. Direct Capitalization Method

Direct capitalization involves capitalizing a ‘normalized’ single - year net income estimated by an appropriate yield. This approach is best utilized with stable revenue producing assets, whereby there is little volatility in the net annual income.

B. Discounted Cash Flow Method

A Discounted Cash Flow Analysis is based upon estimates of future financial performance. The methodology begins with a set of assumptions regarding income and expenses of the Asset and future economic conditions in the local market. The income and expense figures are assessed with adjustments for estimated changes in economic conditions and any contractual commitments. The resultant value is considered the best estimate but is not to be construed as a prediction or guarantee and is fully dependent upon the reasonableness of the assumptions with respect to income, expenses, and market conditions, which are based on information available as at the valuation date.

5.4. APPROACH AND METHODOLOGY ADOPTED

Considering the objective of this exercise, the nature of asset involved and the purpose of the valuation.

We are of the opinion that the **income approach** which is appropriate to value such asset based on the premise that value of an income - producing asset is a function of future benefits and income derived from that asset.

Under the Income approach, **Discounted Cash Flow** analysis is based upon estimates of future financial performance which also considers the income and expenses of the Asset accounting for the future fluctuations due to expected market dynamics.

Hence, for the purpose of this valuation exercise, we have adopted **Discounted Cash Flow Method** (using rent reversion approach) for the operating spaces.

For the purpose of this valuation exercise, we have analysed the tenancy details provided by the Client to identify variances vis-à-vis prevailing marginal rent. In the event the contracted rent is within the threshold, we have assumed that the tenant will continue on the current agreed terms. In the event the rent is higher than the marginal rent threshold, we have assumed that the lease would be renegotiated to marginal rent terms (at the time of the lock-in expiry, next escalation, etc.).

5.5. INFORMATION SOURCES FOR VALUATION

The property related information referred to for the valuation exercise has been provided by the Client unless otherwise mentioned. We assumed any documents provided to be a true copy of the original. The rent roll has been cross-checked with the lease deeds on a sample basis to verify authenticity. Additionally, wherever possible, we have independently revalidated the information by reviewing the originals as provided by the Client.

The table below highlights various data points referred throughout the course of this valuation report and the data sources for the same. Property related documents referred to in the table below have been provided to the Valuer by the Client unless otherwise mentioned.

6. Value Assessment

6.1. ADOPTED METHODOLOGY

We acknowledge that the approaches to valuation differ considerably and that for a particular purpose, alternative approaches to the valuation can be utilized. Considering the objective of this exercise and the nature of asset involved, the value of the Subject Property has been assessed through the following approach:

Asset Name	Valuation Methodology
Ecoworld	Income Approach ~ Discounted Cash Flow Method using Rent Reversion

6.2. OPERATIONAL ASSUMPTIONS

6.2.1. Area Statement

Based on the review of rent roll provided by the Client, the area configuration of the Subject Property is tabulated below:

Block/Tower	Year of Completion	Age of structures (in years)	Built up Area (sft)	Total Leasable Area (sft)	Leased Area (sft)	Vacant Area (sft)*
Campus 1, 2 and 3	Campus 1 – 2012	Campus 1 – 13 Campus 2 – 18 Campus 3 – 16	16,83,871	12,41,926	10,49,759	1,92,167

Source: Rent roll provided by the Client/ The above leasable areas capture the efficiency true up for future committed LOIs in addition to the Architect Certificate.

Based on the Client's input, in addition to the existing operational commercial development, there remains a balance area within the approved Floor Space Index (FSI) that is available for further development. A construction plan has been proposed to utilize this remaining FSI for commercial and retail space, totaling **79,633 sft**. Accordingly, this additional leasable area of 79,633 sft has also been considered for the purpose of valuation. As per the Architect certificate given that the FSI is available within the Subject Property the Client should be able to develop this with appropriate planning and minimal impact on current operation plans.

6.3. TENANCY ANALYSIS

This section provides a summary of the current tenancy configuration of the property as extracted from the tenancy schedule provided by the Client. Brief overview of the type of tenants, area split across various tenant categories, rental share, etc. as of September 30, 2025 has been provided below:

6.3.1. Historical Occupancy Rates

The table below highlights the historical occupancy rates basis the occupied area as on the below mentioned dates for the Subject Property:

31-Mar-21	31-March-22	31-March-23	31-March-24	31-March-25	30-Sep-25
96.1%	95.7%	92.8%	89.4%	85.5%	94.4%

6.3.2. Lease Expiry Analysis

The graph below highlights the area/leases due for expiry in the next 5 years:

Source: Information provided by the Client

As highlighted in the chart above, approx. 43.1% of the area is getting expired by FY30. However, the Subject Property is one of the most sought-after office developments across Bengaluru, with superior tenant mix and relationships. Further, considering the heightened demand for office space witnessed in the micro-market, we opine that the marketing/leasing risk of the Subject Property would be relatively lower.

Additionally, the Weighted Average Lease Expiry (WALE) for the entire property is 5.41 years (by area) and 5.76 years (by rental) as on the date of valuation.

6.3.3. Escalation Analysis

As per the review of recent leasing at the Subject Property it is understood that the contracted escalation terms for these leases are in the range of 15.0% every 3 years are in line with the prevailing market practice witnessed across the micro-market and Bengaluru.

6.3.4. Marginal Rent Analysis

Marginal Rent Analysis evaluates the incremental rental income from leasing additional space or renewing existing leases at higher rents and provides insight into rental growth rates.

As per the Client inputs the CAGR achieved for the Subject Property from FY21 to FY26 YTD is 6.07%.

The graph below highlights the year-on-year analysis:

Source: Rent Roll shared by the client

6.4. CONSTRUCTION TIMELINE

Based on the architect certificate shared by the Client and as per the observation made during the site visit, major part of Subject Property i.e., 7.6 mn sft is operational asset and has received its occupancy certificate as mentioned in the approvals section (Refer Annexure 7.3). Further, based on the Client input, in addition to the existing operational commercial development, there remains a balance area within the approved Floor Space Index (FSI) that is available for further development. A construction plan has been proposed to utilize this remaining FSI for commercial and retail space in campus 6,7,8, totalling 79,633 sft. The construction for which is planned to be completed by FY 2028 – Q3 with a minimal impact on current operation space.

6.5. ABSORPTION TIMELINE

In order to arrive at the absorption levels at the Subject Property, we have analyzed the historical demand and supply trends coupled with the estimation of future supply proposed to be introduced in the subject micro market. Keeping the same in perspective, we are of the opinion that the vacant space in the Subject Property is expected to be leased by end FY 2029 – Q1.

6.6. ASSUMPTIONS – RENTAL REVENUE

6.6.1. Office Lease Rental Assumptions

For the purpose of this valuation assessment, the lease rent adopted for the area already leased is based on the rent roll shared by the Client. Further, we have assessed the prevailing rental values in the micro market. Considering the same, we have adopted the below market rental for the vacant office spaces for the purpose of this valuation exercise.

Leasable Area (sf)	Leased Area (sf)	Basis	Rental (INR psf per month)
74,24,963	70,24,385	In-place Rent for Leased Area	91.9
		Market Rent for Reversion/ Vacant Area (Cluster 1: Campus 1, 2, 3, 4AB, 4C, 5)*	104.0

Market Rent for Reversion/ Vacant Area (Cluster 2: Campus 6, 7, 8, 4D)*	109.0
---	-------

Source: iVAS Assessment; * an additional discount of 5% is considered for the Anchor tenants within the respective blocks upon lease expiry/re-leasing (Anchor Tenant - any tenant occupying cumulative area greater than or equal to 0.1 msf) spaces as on date of valuation.

The above market rent assumption is adopted for the office spaces forming part of the Subject Property. In addition to market analysis, a detailed analysis of the rent rolls was also undertaken to understand aspects such as area occupied, current rent and expiry analysis of the key tenants in the park.

For the occupied space, we have assumed that post lease expiry, these spaces will revert to market rent prevailing at that point in time.

6.6.2. Retail Lease Rental Assumption

In a business park, typically the retail space operates as an ancillary retail, providing convenience to the working population in the Subject Property. To arrive at the market rent for retail area we have analyzed the in-place rental for such spaces within the Subject Property, recent leasing within the property recent retail transactions in the nearby developments and Subject Property, which was observed in the range of INR 90- 120 psf per month.

Leasable Area (sf)	Leased Area (sf)	Basis	Rental (INR psf per month)
190,384	162,088	In-place Rent for Leased Area	96.3
		Market Rent for Reversion/ Vacant Area	96.4

Source: iVAS Assessment

6.6.3. Fit-out Rental Assumptions

As per the information provided by the Client in the rent roll, we understand that in addition to the lease rent, there is rent towards fit-out for few of the tenants. For the purpose of this valuation, we have adopted the tenant wise fit-out details as provided in the rent roll.

6.6.4. Parking Assumptions

Based on the prevailing car parking rate in the Subject Property and Sub-market, we have assumed the following car parking charges:

Particulars	Details
Total Number of Parking Slots	9,630
Total Number of Chargeable Parking Slots	6,580
Vacant space car parking rental (INR per month per slot)	4,500

Source: iVAS Assessment; Rent roll provided by the Client

6.7. ASSUMPTIONS – NON-RENTAL REVENUE

In addition to lease rent revenues, office assets typically have additional sources of revenue. These include CAM revenue, revenues on account of security deposit (refunded at the time of lease expiry / exit), other miscellaneous income (such as cell sites, signages), etc.

Nature of Income	Unit	Details
CAM Revenue	INR psf per month	INR 13.63 psf per month
Property Manager Revenue**	% of Rent, Car parking income and Fitout Income (plus 20% Markup)	6%
Security Deposit*	No. of months' rental	6 months
Rent Free True Up***	INR Mn (Q1CY 2026 to Q4CY 2026)	1,000

Source: Information provided by the Client and iVAS; *Refunded at the time of lease expiry/exit/**As per Client input it is understood that Property Manager Revenue is collected from tenant (which are on Cost plus CAM Model) over and above CAM Revenue. This is collected as 6.0% +20% margin on 6.0% on base rent, cap parking charges and fit-out rent. As per information provided by the Client, it is understood that the Client will receive INR 1,000 Mn from the current owner as a compensation towards future rent free on committed LOIs.

6.8. RENT ESCALATION

Escalation on renewal - Based on the analysis of existing lease rent roll and recent leasing at the Subject Property, it is observed that the typical escalation clause in the Subject Property is 15.0% every 3 years, which is in-line with the trend observed in the market. The same has been adopted by the iVAS for the vacant area and renewals at the Subject Property.

Market Rental Growth – Based on the historical growth trends, increase in the disposable income and feedback from market players, we opine that the rental growth is expected to grow as per the following table:

Particulars	Unit	Details
Escalation for Vacant Spaces	%, no. of years	15% every 3 years
Market Rent Growth Rate	%	5.0% per annum

6.9. CAPITAL EXPENDITURE

6.9.1. Development Cost

Based on the Client input and Architect Certificate, in addition to the existing operational commercial development, there remains a balance area within the approved Floor Space Index (FSI) that is available for further development. A construction plan has been proposed to utilize this remaining FSI for commercial and retail space, totalling 79,633 sft. Accordingly, this additional leasable area of 79,633 sft has also been considered for the purpose of valuation. Cost of construction along with the timeline is tabulated below:

Expense Head	Total Pending Cost (INR Mn)	Period
Construction Cost	537.60	FY27- Q3 to FY28-Q3

Source: Information provided by the Client

6.9.2. Major Repair and Improvements

The table below highlights the assumptions towards the pending expenses/ infrastructure upgrade works in the Subject Property:

Expense Head	Total Pending Cost (INR Mn)
Refurbishment Capex for Ecoworld	2,460

Source: Information provided by the Client

6.10. OTHER ASSUMPTIONS

A development typically has few recurring operation expenses required for the upkeep running of the development. Based on information provided by the Client and market assessment, following expense assumptions have been adopted for the purpose of this valuation exercise:

Nature of Expense	Details
Reserves & Maintenance (R&M) Provision	2.0% of Gross Rental
CAM Expense	INR 11.36 psf per month

Nature of Expense	Details
Property Tax/ Insurance	INR 230.62 Mn as on FY26 as per the Client input with 5.0% p.a. escalation from Apr'26 onwards
Payroll Expense	INR 276.66 Mn for next 12 months as per the Client input with 8.0% p.a. escalation from Apr'26 onwards
Vacancy Allowance	2.5% of Revenue from Operations
Rent Free Period	3 Months
Brokerage	2 Months

6.11. FINANCIAL ASSUMPTIONS

6.11.1. Exit Valuation – Capitalization Rates

The Capitalization Rate (Cap Rate) represents the ratio of Net Operating Income (NOI) to Market Value, indicating the expected income yield at the time of exit. To determine the Cap Rate for the Subject Property, we have analysed various factors, including:

Historical Yields: Historical yields for core retail asset transactions across various key markets in India have shown a steady downward trend over the 10-12 years, decreasing from 10.5-11.5% to approximately 7.5-8.5% over the last four years. This is based on the publicly reported transactions across key micro markets tracked over the years and our in-house intelligence on the implied yields.

Market Appetite and Financing Options: The increased appetite for income-producing assets and the availability of various financing options (real estate credit flows) backing such acquisitions have been considered.

Demand-Supply Dynamics: The demand-supply situation in respective cities and expected dynamics of demand leading supply have been evaluated, taking into account barriers to entry such as land availability and higher initial cost outlays. Developers are expected to focus on emerging locations with positioning of neighbourhood urban consumption centres.

Inflation and Interest Rates: Inflation and interest rates are expected to be maintained in check with interventions from regulators in case of severe swings.

Liquidity and REIT Listings: The liquidity associated with REIT-listed/public listings, including the multiplicity of buyers and relatively lower budgets per buyer, has been considered.

To estimate the exit valuation, NOI has been capitalized using prevalent / expected market yields for institutional sale of commercial properties in the market. A few recent transactions witnessed for commercial assets across various micro markets/ cities (as available in the public domain) have been detailed below:

City/Location	Date of Transaction	Area (sft)	Deal Value (INR Mn)	Indicative Yield
Bengaluru	Q3 2025	172,493	1,762	7.5% - 8%
Delhi	Q3 2025	259,398	7,500	7% - 7.5%
Hyderabad	Q1 2025	1,822,433	20,380	7.9% - 8.4%
Bengaluru	Q1 2024	1,210,000	14,750	7.75% - 8.25%
Bengaluru	Q4 2023	119,000	595	8.5% - 9.0%
Pune	Q1, 2023	2,308,619	13,469	7.25% - 7.5%
Bengaluru	Q3, 2022	850,885	8,500	8.0% - 8.25%
Hyderabad	Q1,2021	639,495	5,060	8.00% - 8.25%
PAN India	Q4, 2020	21,000,000	110,000	8.5% - 8.75%

City/Location	Date of Transaction	Area (sft)	Deal Value (INR Mn)	Indicative Yield
Gurgaon	Q4, 2020	813,000	19,700	8.0% - 8.25%
Bengaluru	Q4, 2020	8,200,000	97,820	7.50% - 7.75%
Bengaluru	Q1, 2020	1,870,000	25,000	8.75% - 9.00%

Source: Market Research, *Yields mentioned in the table are on market rentals & exclusive of interest on security deposits; Please note that, due to the confidential nature of real estate transactions, most deal details, including Net Operating Income (NOI), are not publicly disclosed. Consequently, we relied on information on our market intelligence from various market sources, which may not be entirely accurate.

Based on the analysis, we observed that comparable institutional deals of similar assets over the last 2-3 years are in the range of 7.00% to 9.00%. Additionally, we have evaluated the Subject Property and micro market based on three key parameters:

- Market Conditions: Assessed location, demand-supply dynamics, and rental growth prospects.
- Weighted Average Lease Expiry (WALE): Evaluated average lease tenure, lease expiry schedule over the next few years, and tenant profile.
- Building Grade: Considered building age, quality of construction, and presence of on-site amenities.

Considering the comparable deals, performance, and micro market attributes, we opine that the exit Cap Rate for the Subject Property should be similar to the transacted comparable deals. The Subject Property is capitalized at 7.75%.

The net exit value (transaction cost on exit) is further adjusted for exit costs to the extent of 1.0 % of exit value based on prevailing market rates.

6.11.2. Discount Rate

For discounting the cash flows, an appropriate discount rate has been calculated on the basis of estimated 'Weighted Average Cost of Capital' (WACC), as set out below.

6.11.3. Cost of Equity

The Valuer has computed the cost of equity as per the Capital Asset Pricing Model (CAPM), which is derived as follows:

$$\text{Cost of equity} = \text{Risk Free Rate (Rf)} + \text{Beta } (\beta) * (\text{Market Return (Rm)} - \text{Risk Free Rate (Rf)})$$

As mentioned above, the cost of equity computed using CAPM constitutes of the following components:

- **Risk free rate (Rf)**

The Risk-Free Rate is based on the 10-year Government Securities Yield (G-Sec) rate in India, which is currently 6.58% as of the valuation date as published by RBI

- **Market return (Rm)**

Computed based on the returns of BSE SENSEX stock index for the past 10 financial years averaging to 10.5%

- **Beta (β)**

Following are the steps adopted for the calculation of Beta

Step 1: Compute Unlevered Beta (β_u) = 0.94%

Computed basis correlation of the key listed realty stocks in India versus. BSE SENSEX

Step 2: Determine Sector's Average Debt-to-Equity Ratio = 47.7%

Opined basis the capital structure of the listed realty stocks in India

Step 3: Re-lever the Unlevered Beta (β_u) = 1.28

Derived basis the sector's average debt to equity ratio as of the valuation date

Further, utilizing the computed parameters, post-tax cost of equity of 11.7% was calculated and then adjusted for a 25% tax rate to estimate the pre-tax cost of equity of 15.5%.

For Operational Assets: Since this computed cost of equity is based on the listed realty stocks which comprises of diverse portfolio of land, under-construction, and operational assets, we have adopted a discount on the expected equity return from stabilized assets with recurring income to 14.5% to reflect the Subject property's operational status with no development and approvals risk. This adjustment is based on our market understanding, inputs from key players, and opinion on the Asset's performance.

6.11.4. Cost of Debt

The cost of debt for completed assets has been considered based on prevalent Lease Rental Discounting (LRD) rates for Grade A office/retail assets across submarkets which ranges from 8% to 9% depending upon the asset quality, borrower profile, tenure, etc. based on our interactions with lenders involved in LRD financing.

6.11.5. Weighted Average Cost of Capital (WACC)

As highlighted earlier, the cost of debt is based on prevalent LRD rates, while the cost of equity reflects asset and market-specific attributes for an operational Grade A asset. Further, the debt and equity proportions are determined using market-led loan-to-value (LTV) ratios and stabilized ratio over the tenure of the loan. This proportion can vary depending on parameters like LTV eligibility and cost of debt for different asset classes. Considering the same, we have adopted a debt-equity ratio of 47.5% - 52.5% for the Subject Property.

The following Discount rates have been assumed for the valuation exercise:

For Operational Space:

Component	Proportion	Cost	WACC
Debt	47.50%	8.70%	11.75%
Equity	52.50%	14.50%	

Source: Valuer Assumptions

For Future Development

Component	Proportion	Cost	WACC
Debt	60.0%	10.50%	13.70%
Equity	40.0%	18.50%	

Source: Valuer Assumptions

6.12. VALUE OF THE SUBJECT PROPERTY

Based on the above analysis, the value of the Subject Property, as of date of valuation, comprising operational component and unutilized FSI is mentioned below:

Particulars	Methodology	Value (INR Mn)
Ecoworld – Operational Commercial Area	Discounted Cash Flow Method	1,40,248
Proposed Area	Discounted Cash Flow Method	603
Total		1,40,851

Based on our valuation assessment please find below projected year-on-year net operating income (NOI) for the Subject Property:

Component	FY 26	FY 27	FY 28	FY 29	FY 30	FY 31	FY 32	FY 33	FY 34	FY 35	FY 36
Projected NOI (INR Mn)	3,509	8,284	10,153	11,310	12,156	12,721	12,932	14,200	15,083	15,834	16,869
Y-O-Y Growth %			23%	11%	7%	5%	2%*	10%	6%	5%	7%

Source: Valuer's assessment; *owing to lease expiry and limited contracted escalations.

The projected NOI growth will be driven through a combination of contractual escalations in rental, downtime and rent-free period post leases expiry. Further, in addition, there will be occupancy ramp up along with mark to market potential for leases expiring over the course of next ten years leading to increase in NOI. For detailed cashflows please refer to Exhibits and Addendums section 7.0.
